Based on the structure equation model, the paper expounds the influence of emotional intelligence's four dimensions on individual innovation behaviour and explores the mechanism of constructive controversy as a partial mediator. In addition, the samples collected in this paper include the team of the enterprise, the course work of the college students and the innovation competition groups, so the conclusion has extensive application values.</p> <p>M10, D19</p> <p>emotional intelligence, innovation behaviour, constructive controversy, structural equation model</p> <p>Journal of Applied Management and Investments</p> <p>2018</p> <p>May</p> <p>7</p> <p>2</p> <p>113-124</p> <p>http://www.jami.org.ua/Papers/JAMI_7_2_2018_113-124.pdf</p> <p>text/html</p> <p>repec:ods:journl:v:7:y:2018:i:2:p:113-124</p> <p>Available references (?)</p> <p>Publications of others or not claimed by the author(s)</p>	<p>+ Citations at Google Scholar by the title</p> <p>Xiaohan Hu <input type="checkbox"/> person </p> <p>Shanghai University, China <input type="checkbox"/> org </p> <p>Tian He <input type="checkbox"/> person </p> <p>Shanghai University, China <input type="checkbox"/> org </p> <p>To annotate the abstract at the left please login (?)</p> <p></p> <p>emotional intelligence </p> <p></p> <p>please login to comment PDF file (?)</p> <p>(?)</p>
